

SCAVENGER HUNT

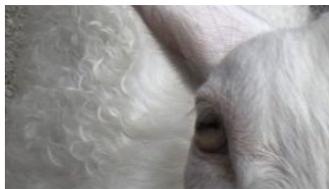

Seek and find at your zoo!

My fur is black and I love to climb, but here you might find me napping. The forest in the Great Northwest is what I call home. One of my favorite things to eat is fish.

I am a _____

You can look up and catch me flying through the sky, but here my white head will give me away. I hunt for prey, using my talons to catch food. I am a

You can find me in the farm where I like to run around and play. I eat hay and veggies. Follow my brays or even maas. I am a

I have a wingspan of 10 feet, making me the biggest bird in this whole continent! I am carnivorous but seek out food that is already dead. I am a:

Though I have black skin, my thick white-looking fur helps me to blend in with snow and ice, and it keeps me warm both on land and when I'm diving in the water.

If you look closely, you may find two of us here at the zoo!

I am a

I like to swing around and play from tree to tree. I live in groups and am very good at making tools and solving problems. Come check out my new habitat. I am a

Seek and find at your zoo!

My long, strong nose gives me away. I have large ears and live in family groups. You can find us stomping around our lands.

Some consider me the king of the jungle. I am an African carnivore and you can hear my roar from miles away. We usually form groups that stick together. We pride ourselves on that.

I am a _____

I'm the fastest animal on Earth. My body is covered in black dots to help me blend in with the savannah.

I am a _____

My skin is rough and grey, despite my name. I am known for my pointy nose. I weigh about 3,000 pounds and can be found in the Africa Savanna.

I am a _____

My long neck gives me away. I can eat leaves from tall branches because of my super long and very cool purple tongue.

I am a _____

I am pretty and pink with an upside down beak. Sometimes you can see me standing on one leg. Do you know how I get my distinctive coloring? I am a

Seek and find at your zoo!

I am fairly new to the Oregon Zoo. I'm a small mammal and I can swim really well. There are two other kinds of my species here but I'm special because I have big spots down my neck. You can see me in the waters of Africa.

I am a

_____ - _____

I sleep upside down during the day and am more active at night. Watch me and my friends eat fruit in the tree top canopy.

I am a _____

I am a carnivore and am known to be the biggest animal of my kind, weighing as much as 300 pounds. Despite my size and bright stripes, I am really good at camouflaging, which helps me sneak up on prey. I am an

When I first came to the zoo, I was as small as a quarter. The zoo helps me and my kind grow big enough to not be eaten by bullfrogs and bass. I am an omnivore and am native to Oregon and Washington. Find me in the NEST,

I am a

I'm a great climber, but I also camouflage from predators with my red, black, and white fur. I spend most of my time on trees and eat bamboo. You can find me in the mountain ranges of southwestern China and India. I am a
